By confirming this print proof, the Customer agrees that the technical and graphical information in it is correct, and orders the production of printing plates. Printing target is only the print proof printed using the flexographic/digital printing simulator. Actual product compliance to the print proof is evaluated as follows: CMYK – according to the print proof, Pantone – according to the Pantone color palette. Pantone colors in digital printing are simulated and printed in raster. Should you prefer already existing product as a printing target, it must be accompanied with the original layout for preparation. Cancellation of the print proof ready for approval and/or non-approval may be charged. Cancellation of the approved print proof and/or cancellation of the order may be charged in accordance with the agreed rate for the printing plates.
